CHILDREN BURNED TO DEATH

THIRTY FAMILIES RENDERED HOMELESS.

FIRE IN TENEMENT-HOUSES IN FIFTY-FOURTH-ST .-A MOTHER'S CARELESSNESS.

Six four-story double frame tenement-houses standing in a row and extending from No. 314 West Fifty-fourth-st, southward a distance of 160 feet toward Fifty-third-st., were nearly destroyed by fire yesterday. The buildings have been known as the Terrace Flats, but for about six months they have been called the "Nigger Row." A narrow courtyard in front of the houses separates them from the grounds of the Amity Baptist Church, while the Ninth Avenue Railroad car stables are built close against the rear walls of the houses were built twenty-five years ago, and previous to last May they were occupied by Irish and German families. In March the property was purchased by Kramer Brothers, whose agent is Samnel Milligan, of No. 269 West Thirty-fourth-st. On May 1 all the white families who had occupied rooms in the houses were obliged to leave, and only colored people were admitted as tenants. The change displeased the occupants of the large brownstone apartment houses on the north side of Fifty-fourth-st. It was thought by a number of people residing in the street that the owners of the tenement-houses wished to make them objectionable to other property-owners. Forty-eight families of colored people lived in the tenement houses yesterday.

Mrs. Elizabeth Judson, who occupied rooms on

ment-houses wished to make them objectionable to other property-owners. Forty-eight families of colored people lived in the tenement houses yesterday.

Mrs. Elizabeth Judson, who occupied rooms on the first floor of the fourth house, went out at 5 p. m., leaving her three small children locked in a rear room. It was supposed that one of the children pulled a lighted kerosene oil lamp from the table and set fire to the house. Ten minutes after Mrs. Judson had left the building the flames were discovered by John L. Edwards, the janitor. He made an ineffectual attempt to rescue the children. When he broke open the door, the flames drove him from the room, but he saw two of the children and heard their cries. The little ones were burned to death, while other inmates of the houses were escaping. An old negro named Floyd, who was nearly blind, jumped from a fourth-story window and escaped with slight injury. The flames spread so rapidly that the women and children in the houses were unable to save much property. Three alarms summoned enough firemen and policemen to prevent a further loss of life. Police Captain Killilea led a number of officers into the building and rescued a number of small children whose mothers had neglected them in the endeavor to save furniture. Detective James H. Riley found two babes alone in the room full of smoke and carried them out, one under each arm. He afterward saved a gold watch and chain which a colored woman had dropped in a hallway.

So rapid was the spread of the flames that all of the six buildings were on fire before the firemen got to work. The streams from eleven engines prevented the fire from extending to the car-atables, and the fire was extinguished before the tenementhouses were half burned up. The bodies of Mrs. Judson's children were found burned beyond recognition. The woman was searching for her children for some time after the recovery of their bodies, the police having kept her in ignorance of their fate. She said they were Hattie, three years old; Mabel, two years

GEORGE A. DREW'S MISTARE.

GEORGE A. DREW'S MISTAKE.

J. Howard Reed, of No. 121 West Sixteenth-st., and Joseph Burrett, of No. 7 Sixth-ave., were arrested on Sunday night by a policeman of the Twenty-ninth Precinct on a charge, made by George A. Drew, of No. 159 West One-hundred-and-twenty-eighth-st., an agent for Dodd's Express Company, of stealing his watch. Both Mr. Reed and Mr. Burritt had the appearance of being eminently respectable and it was only after Mr. Drew made a specific charge against them that the police ergeant would consent to put them in cells.

Yesterday morning the accused men were arraigned before Justice Patterson in the Jefferson Market Police Court, and when Mr. Drew was asked to make his charge anew he refused saying that he "thought he had been mistaken." The Rev Dr. Kraus, of the St. Ann's Episcopal Church, informed the Justice that Mr. Reed was a teacher in his Sunday-school and he could answer for his honesty in every respect. Justice Patterson then honorably discharged the prisoners from custody.

Mr. Reed is a dentist and was graduated from the College of Dentistry of this city in 1881. He is well-known in social circles. He explained the accident of his arrest by saying that he was walking down Sixth-ave, and had stopped at Twenty-third-st. to watch the stream of water which was then flowing from the interior of the Masonic Temple when he heard an outcry and felt himself seized by Mr. Drew, who accused him of theft. He remonstrated with the man, but to no purpose. Mr. Reed intends to prosecute Mr. Drew for false imprisonment.

THE WORK OF A DRUNKEN ENGINEER.
William Belden, the well-known stock broker of No. 80 Broadway, was in a peaceful frame of mind last Sunday night. He had closed the door of his library in his home, No. 814 Fifth-ave., and had settled himself in his reading chair, when he became aware that the room was becoming inconveniently warm. Windows and doors were opened; ice was in demand, an india-rubber plant in the hallway began to bloom and the varnish began to role itself up in self-protection on the mahogany furniture. Mr. Belden descended into the engine-room and there found the genius of the place. Thomas Sullivan, of No. 1,038 Third-ave., comfortably and somnolently drunk. Mr. Belden glanced at the steam-guage and saw that the needle pointed to seventy pounds. He had been informed that the boiler was registered at only forty pounds, by its builder. The broker turned the escape valve and tried to draw the fires and was quietly perspiring in front of the redhot furnaces, when Sullivan rose in the dignity of his calling and smote Mr. Belden on the eye, calling him names, and then left the engine-room shrieking his defiance.

A policeman arrested Sullivan, on a charge of assault and battery preferred by Mr. Belden, while he was pleasantly engaged in smashing dishes in his home. Justice Power, in the Yorkville Police Court, vesterday morning heard the story and held Sullivan to answer. THE WORK OF A DRUNKEN ENGINEER.

RESULT OF NOT USING THE CABLE.

George Flood, or George Perry, the young Englishman whose extradition is asked for by the British Consul-General on a charge of forgery, was again taken before Commissioner Osborn yesterday. He was held on a cable dispatch from England, which simply said that he was wanted for the crime of forgery. Mr. Osborn has frequently held, in accordance with decisions of Judge Blatchford and others, that the cable must be made use of by the demanding government to get information as to the crime, place and circumstance of the commission of the crime, in order that the prisoner may know of what he is accused. The Commissioner decided on Saturday that he would let Flood go unless the particulars were furnished by the English Government yesterday. F. F. Marbury, the counsel for Consul-General Booker, came into the Commissioner's room yesterday with a law book under his arm, but without the required information. He had only a telegram from the British Minister instructing him to use every means to have the prisoner kept in custody till the papers in the case arrived on the Scythia. Colonel Spencer asked for the discharge of the prisoner.

After a short argument by the counsel Commissioner Osborn di senarged the prisoner, who went away with his wife and little child. RESULT OF NOT USING THE CABLE.

THE WILL OF THE MURDERER CHISHOLM. The will of John Chisholm, the executed Newark wife murderer, which was made a few hours provious to his death, was offered for probate in the Surrogate's office at Newark yesterday, by Chisholm's counsel. The provisions of the will are as

follows:

First, it is my will, and I do order that all my just debts and funeral expenses be duly paid and satisfied as soon as conveniently can be after my decease, then I give and bequeath unto my loving father, Alexander Chisholin, all my personal property of whatever kind. Second, I hereby appoint my loving father, Alexander Chisholin, guardian of my childrer during their minority, requesting my said father, as the guardian of my children, to educate and discipline my children in the Catholic faith.

The will appoints Thomas Chisholm, a brother, and William Delaney executors. On behalf of the Macomber family, who have the enstody of the children, a caveat was filed against the will, on the ground that Chisholm, having been convicted of nurder and executed, was civilly dead and had no power to make such an instrument. The counsel for Chisholm said yesterday that as soon as the will shall have been proven in the court he will proceed before the Chancellor by writ of habeas corpus to place the children under the care of Chisholm's relatives. The latter are Roman Catholics, while the Macombers are Protestants.

NO EVIDENCE AGAINST RHEHALL.

NO EVIDENCE AGAINST RHEHALL.

The police of the Twenty-ninth Precinct will reflect hereafter before taking any decided action against a person accused of crime by a constable of Queens County. Regarding Joseph Bennett and James Ayres, "detectives" from the scene of the Maybee murder, as men of average intelligence, Captain Williams on Saturday assisted them in the arrest of Edward Rhehall, an nuoffending bricklayer, who had the misfortune to live some weeks ago in Brookville, where the crime was committed. He was imprisoned in the precinct station and was kept there until yesterday afternoon, when he was arraigned before Justice Patterson in the Jefferson Market Police Court for the

third time. As no representatives of Queens County were present to make good the grounds of suspicion upon which he had been arrested, he was discharged. Early in the morning he was confronted with the shoe-dealer to whom, it was asserted, he had paid the worn five-dollar goldpiece which was the only bit of evidence against him, and the man failed to identify him. Bennett and Ayres were informed by CaptainWilliams that Rhehall was still in his keeping, and were asked to be present when the man was taken to court. The "detectives" failed to come to the city.

After Rhehall had been discharged he was asked by a Tribune reporter how he accounted for his arrest. He explained that at first he did not recognize Bennett, who accosted him on Saturday night, but that while imprisoned he remembered that he had been employed as superintendent of a mill at Roslyn and that Bennett had been one of his workman. Bennett had shirked his work, and Rhehall, upon complaining to the owner, had the man discharged. He attributed his arrest to personal spite on the part of Bennett.

John Doyle, who was arrested some days ago for complicity in the murder, has been released from custody at Oyster Bay, L. I., there being no evidence connecting him with the crime.

GREAT MEN SPEAK.

To the readers of the Tribune.

The proprietors of the article to which attention is directed in this column, firmly believe that there is nothing unbusiness-like or unprofessional in giving the widest publicity, by means of newspaper advertising and otherwise, to articles of unquestioned merit, whether of a medicinal or other nature. They furthermore believe, that the sweeping objection occasionally urged by some people against advertised preparations, is born of dis-honesty, rather than of unprejudiced judgment. Fully convinced of their article's marvellous efficacy, as

monstrated in millions and millions of homes in every and and clime, they unhesitatingly offer it to the public in every civilized country, as the most wonderful preparation of its kind ever discovered; and they do this by ration of its kind ever discovered; and they do this by methods which they hold to be not only business-like and honorable, but in e.ery way right and proper. Belleving that a medicine, like a man, is best judged by its action and indorsements, they present herewith the unqualified testimonials of men eminent in public and private life, all over the world. It must readily appear to every fair-minded man that neither favor, influence nor money could purchase the unrestricted approval of the distinguished personages, whose positive convictions are here given. Nothing but unexampled merit on the part of the article in question and a full realization of the claims advanced in its favor, could call forth such unanimous and enthusiastic praise. It is this intrinsic merit that has caused the term "St. Jacobs Oil" to become synonymous with the words: "It conquers Pain," in the homes of over one hundred and fifty millions of people in the new world and the old.

The public will please note that the names given are those of well-known, responsible parties. These are not silent witnesses. Their statements are positive and unqualified. They are nineteenth century facts. The parties whose testimony is given are all alive. No grave-yards have been robbed to swell the list.

HALL'S HAIR RENEWER.

The great popularity of this preparation, after its many years of test, should be an assurance, even to the most skeptical, that it is really meritorious. Those who have used HALL'S HAIR RENEWER know that it does all that is claimed.

It causes new growth of hair on bald heads—provided the hair follicles are not dead, which is seldom the case; restores natural color to gray or faded hair; preserves the scalp healthful and clear of dandruff; prevents the hair falling off or changing color; keeps it soft, pliant, lustrous, and causes it to grow long and thick.

thick.

HALL'S HAIR RENEWER produces its effects by the healthful influence of its vegetable ingredients, which invigorate and rejuvenate. It is not a dye, and is a delightful article fon tollet use. Containing no alcohol, it does not evaporate quickly and dry up the natural oil, leaving the hair harsh and brittle, as depther preparations. other preparations.

Buckingham's Dye

WHISKERS

Colors them brown or black, as desired, and is the best dye, because it is harmless; produces a permanent natural color; and, being a single preparation, is more convenient of application than any other.
